WORK EXPERIENCE

Senior Frontend Developer / Frontend Lead
BlueBat Games

05/2018 – Present

BlueBat Games has taught me numerous idiosyncrasies about the casino industry. UX is driven by data and business acumen. I love delivering highly polished experiences to our clients and players.

Achievements/Tasks

- Maintaining the feature-set and stability of 6 different white label social casinos.
- Ensuring consistent delivery of features across web, iOS, and Android (all different codebases).
- Leading the migration from split front-end codebases to a single React Native project.
- Interpreting client requests and delivering high quality solutions.

Lead Web Developer
Bravenet Web Services

09/2017 – 05/2018

Bravenet has given me numerous opportunities to flex my hardcore knowledge of web development with a heavy focus on UX. The sophisticated requirements of simplifying the web have been a welcome challenge.

Achievements/Tasks

- Creating and refactoring wysiwyg builders for web and mail.
- Building reusable UI component libraries with VueJS.
- Modernizing old services without alienating existing customers.
- Planning and troubleshooting feature deployment under a legacy codebase.
- Restructuring policies and workflows to increase the visibility of development.

Web Developer
Relic Entertainment

11/2015 – 09/2017

Working with Relic forced me to finesse my soft skills. With departments in Europe, 3rd party software vendors, and multiple people for feature approval; I feel I have mastered navigating the workplace and become a valuable resource in the communication of designing technology.

Achievements/Tasks

- Creating https://www.dawnofwar.com and fulfilling the marketing team's requirements and wishes.
- Facilitating 3rd party vendors in their implementation of frameworks and SSO portals.
- Rapid prototyping of ideas, creating minimum viable products.
- Working with and maintaining cutting edge Javascript technologies; React, Webpack, NodeJS.
- Improving deployment procedures, and management of static data.
- Maintaining the numerous websites under the Relic brand.
